Student: I> they will get best **coaching**/education – study material.

II> they will get best college on the basis of their rank.

III> they will get many **options**/ futuristic tools through one self-sufficient organized platform.

III> they can understand, for future which will be best for them. (Widens their thought process)

iv> free all India mock test similar to real competitive exam.

College: I> we will increase their popularity all over the country (marketing).

II> we will give them a huge number of quality student.

III> we will improve placements of particular college.

IV> free industrial training

V> placement preparation

Coaching Centers: I> they will increase their popularity through one platform.

II> they will get a huge no. of student.

Guardian: I> they can secure their child's future

II> they also can understand which course will be best for their child.

III> they can analyze their child's present(live) stage of preparation. **[FREE]**

School: I> we will increase their popularity. (marketing)

II> we will give their student a good future. (They don't care)

Teachers: I> An organized interactive teaching learning process.

II> Again huge market for them to sell their material.

III> Less burden of syllabus completion and individual student while teaching millions of students on the same plane.

Corporations: I> Compatible students are only sitting for the interviews.

II> High probability of hiring real talent not on the basis of only academics.
